Table of contents

No. 1 1—118 issued on May 13, 1986
No. 2 119—232 issued on July 4, 1986
No. 3 233—360 issued on August 22, 1986
No. 4 361—472 issued on November 12, 1986
No. 5 473—602 issued on December 17, 1986
No. 6 603—728 issued on February 27, 1987

Allen, L. J. S.: Persistence, extinction, and critical patch number for island populations 617
Alt, W., Lauffenburger, D. A.: Transient behavior of a chemotaxis system modelling certain types of tissue inflammation 691
Arcuri, P., Murray, J. D: Pattern sensitivity to boundary and initial conditions in reaction — diffusion models 141
Artzrouni, M.: The rate of convergence of a generalized stable population 405
Asmussen, M. A.: The dynamics of interlocus associations in the three-locus hitchhiking model. 2. The pairwise linkage disequilibrium between two neutral loci 361
Bélair, J.: Periodic pulsatile stimulation of a nonlinear oscillator 217
Belić, M. R., Škarka, V., Deneubourg, J. L., Lax, M.: Mathematical model of honeycomb construction 437
Bell, J., see Chi, H., et al. 583
Brannan, J. R.: Relaxation spectra of interactive neural systems 423
Bürger, R: On the maintenance of genetic variation: global analysis of Kimura's continuum-of-alleles model 341
Butler, G. J., Wolkowicz, G. S. K.: Predator-mediated competition in the chemostat 167
Chi, H., Bell, J., Hassard, B.: Numerical solution of a nonlinear advance-delay-differential equation from nerve conduction theory 583
Colli, P.: A mathematical model of heterogeneous behavior of single muscle fibres 103
Cushing, J. M.: Periodic Lotka—Volterra competition equations 381
Cushing, J. M.: Equilibria in systems of interacting structured populations 627
Deneubourg, J. L., see Belić, M. R., et al. 437
Edelstein-Keshet, L.: Mathematical theory for plant-herbivore systems 25
Ellner, S., see Schaffer, W. M., et al. 479
Gyllenberg, M.: The size and scar distributions of the yeast *Saccharomyces cerevisiae* 81
Hadeler, K. P.: The hypercycle, traveling waves, and Wright's equation 473
Hallam, T. G., Ma, Z.: Persistence in population models with demographic fluctuations 327
Hanson, F. B., see Ryan, D. 259
Hassard, B., see Chi, H., et al. 583

Hastings, A.: Cycles in cannibalistic egg-larval interactions 651
Hoeven, N. Van der: Coexistence of incompatible plasmids in a bacterial population living under a feast and famine regime 313
Hudson, R. R., Kaplan, N. L.: On the divergence of members of a transposable element family 207
Hyman, J. M., see Perelson, A. S., et al. 525
Janssen, I.: A stochastic repair—misrepair model for the effects of radiation on cells 681
Kaplan, N. L., see Hudson, R. R. 207
Kerchner, V., see Niklas, K. J. 1
Kot, M., see Schaffer, W. M., et al. 479
Lauffenburger, D. A., see Alt, W. 691
Lax, M., see Belić, M. R., et al. 437
Lefèvre, C.: Threshold behaviour for a chain-binomial S-I-S infectious disease 59
Ma, Z., see Hallam, T. G. 327
Maini, P. K., see Perelson, A. S., et al. 525
Mangel, M.: Solution of functional difference equations from behavioral theory 557
Manton, K. G., see Yashin, A. I., et al. 119
Morrish, K.: Performance of one- and two-dimensional models for a slow flow system in a long, permeable tubule 237
Morton, R. H.: A three component model of human bioenergetics 451
Murray, J. D, see Arcuri, P. 141
Murray, J. D, see Perelson, A. S., et al. 525
Namkoong, G., see Selgrade, J. F. 193
Niklas, K. J., Kerchner, V.: Aerodynamics of *Ephedra trifurca*. II. Computer modelling of pollination efficiencies 1
Noonburg, V. W.: Competing species model with behavioral adaptation 543
Oster, G. F., see Perelson, A. S., et al. 525
Perelson, A. S., Maini, P. K., Murray, J. D., Hyman, J. M., Oster, G. F.: Nonlinear pattern selection in a mechanical model for morphogenesis 525
Rothman, E. D., Weber, N. C.: A model of weak selection in the infinite alleles framework 353
Roy, A. B., Solimano, F.: Global stability and oscillations in classical Lotka—Volterra loops 603
Rumschitzki, D. S.: Spectral properties of Eigen evolution matrices 667
Ryan, D., Hanson, F. B.: Optimal harvesting of a logistic population in an environment with stochastic jumps 259
Schaffer, W. M., Ellner, S., Kot, M.: Effects of noise on some dynamical models in ecology 479
Selgrade, J. F., Namkoong, G.: Examples of the effect of genetic variation on competing species 193

Singh, M. K.: The genetic algebra for polyploidy with several loci 723
Škarka, V., see Belić, M. R., et al. 437
Sod, G. A.: A numerical study of oxygen diffusion in a spherical cell with the Michaelis-Menten oxygen uptake kinetics 279
Solimano, F., see Roy, A. B. 603
Stallard, E., see Yashin, A. I., et al. 119
Sudalaiyandi, G., see Udayabaskaran, S. 467
Tallis, G. M.: On the joint asymptotic distribution of additive genotype for polygenic characters 233
Timischl, W.: On the process of stabilization in the renewal model: approximations for the time to convergence 71
Torras i Genís, C.: Entrainment in pacemakers characterized by a V-shaped PRC 291
Tuljapurkar, S.: Demography in stochastic environments. II. Growth and convergence rates 569
Udayabaskaran, S., Sudalaiyandi, G.: On a stochastic integral of a branching process 467
Weber, N. C., see Rothman, E. D. 353
Wolkowicz, G. S. K., see Butler, G. J. 167
Yashin, A. I., Manton, K. G., Stallard, E.: Dependent competing risks: a stochastic process model 119
